

## Diagrama de clases 1 (uml1)

```
public abstract class Forma {
```

```
    private int x;
```

```
    private int y;
```

```
    private String color;
```

```
    public void forma(fuente) {
```

```
    }
```

```
    public abstract void clonar() ;
```

```
}
```

```
public class Aplicacion {
```

```
    private List<Forma> forma;
```

```
}
```

```
public class Rectangulo extends Forma {
```

```
    public int ancho;
```

```
    public int alto;
```

```
    public void rectangulo() {
```

```
    }
```

```
    public void clonar() {
```

```
    }
```

```
}
```

```
public class Circulo extends Forma {
```

```
    public int radio;
```

```
    public void circulo() {
```

```
    }
```

```
    public void clonar() {
```

```
    }
```

```
}
```
