

Diagrama de clases 2 (uml2)

```
public abstract class Dialogo {  
    public void render(){  
    }  
    public abstract void crearBoton (Boton boton);  
}
```

```
public class DialogoWindows extends Dialogo{  
    public void crearBoton (Boton boton) {  
    }  
}
```

```
public class DialogoWeb extends Dialogo {  
    public void crearBoton (Boton boton) {  
    }  
}
```

```
public interface Boton {  
    public void renderizar();  
    public void onClic();  
}
```

```
public class BotonWindows implements Boton {  
    public void renderizar();  
    public void onClic();  
}
```

```
public class BotonWeb implements Boton {  
    public void renderizar();  
    public void onClic();  
}
```
